Official Policy 4-OP-H-5.1.

Procedure for Defining University Units

Definitions

University Unit refers to an individual unit or group of consolidated units made up of a school or college and any departments or divisions which are a subdivision of a college or school; centers, facilities, labs, libraries, or programs within a college or school, or as an independent entity; offices; associations; and administrative units.

Mission Critical is any factor (component, equipment, personnel, process, procedure, software, etc.) that is essential to business operations.

Reputational Harm often called reputation risk, is the potential loss of financial capital, social capital, or market share resulting from damages to an organization's reputation.

Significant Harm is the permanent loss of revenue to the organization in excess of \$1M.

Inclusion Criteria

The Vice President for Finance and Administration and the University Provost, or other designated University executive management, will identify University units that provide business functions that if disrupted may impede the University's ability to meet its mission and/or strategic goals, may have a major financial or reputational impact, or may result in significant regulatory or contractual noncompliance. The units are required to participate in the vulnerability management program on an ongoing basis, and maintain a Business Impact Analysis, Disaster Recovery Plan and Risk Assessment on a triennial basis.

University units also are required to develop and maintain an annual Continuity of Operations Plan meeting emergency management requirements identified in <u>Official Policy 4-OP-E-10</u> <u>Continuity of Operations Planning (COOP)</u>. Disaster Recovery and Continuity of Operations Plans shall be designed to ensure necessary unit preparedness and response capabilities are in place in response to natural disasters and types of incidents that may result in significant impact or prolonged disruption to normal business activities.

Annually, each University unit identified to maintain a Disaster Recovery Plan will train team members as required in Official Policy 4-OP-H-5 General Standards for All University Units and 4-OP-H-5 General Standards for IT Management and Operations. This includes incident response and other associated security and privacy training activities. See 4-OP-H-5 sections II.B and II.D for additional information. Units will exercise their Disaster Recovery Plans on an annual basis, document lessons learned, and develop remediation steps to address plan weaknesses. Business Impact Analyses, Disaster Recovery Plans, Disaster Recovery Tests, Lessons Learned, and Risk Assessments will be submitted to the University Chief Information Security Officer in the Information Security and Privacy Office for review by the end of the calendar year as referenced in the Alternating Three-Year Cycle.

Units with vendor contracts supporting mission critical business processes shall include contract terms requiring the vendor for such contracts to meet the disaster recovery and continuity of operations requirements of the University Unit. Vendor contracts supporting mission critical business processes shall also include an annual independent information security audit report, such as a SOC 2¹ report. If such vendors do not have an independent audit report, the University has a third-party risk self-assessment process that can be utilized. Units are required to include vendors supporting mission-critical business processes in the unit's Business Impact Analysis. Requirements in this paragraph become effective 6 months after the date of last revision.

University Units by Parent Organization

The following University Units are identified as meeting the inclusion criteria and are required to comply with the official policy and procedure. The Units have been consolidated, where feasible, to align with the University's organizational structure and the functions they provide for their parent organization.
